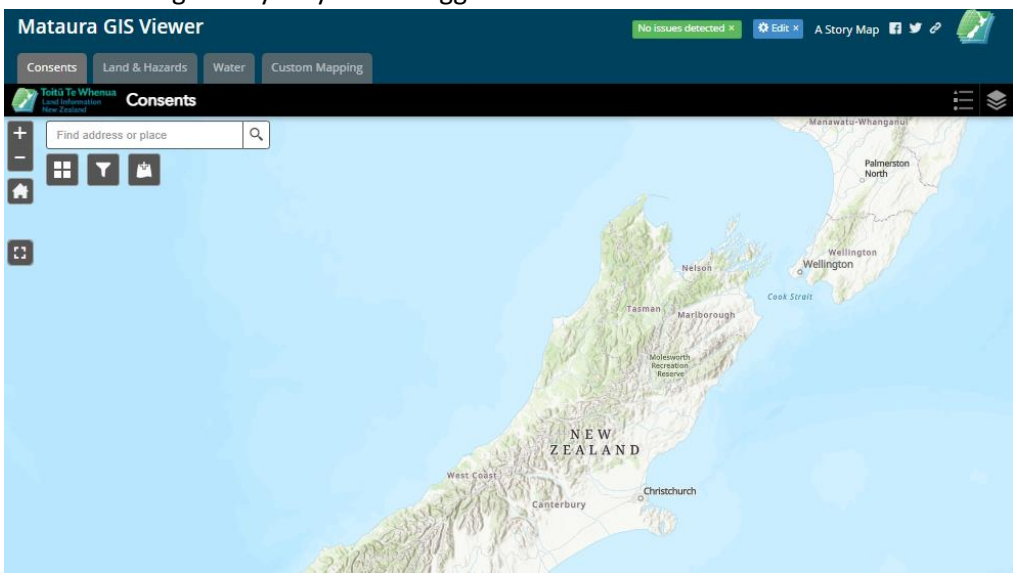
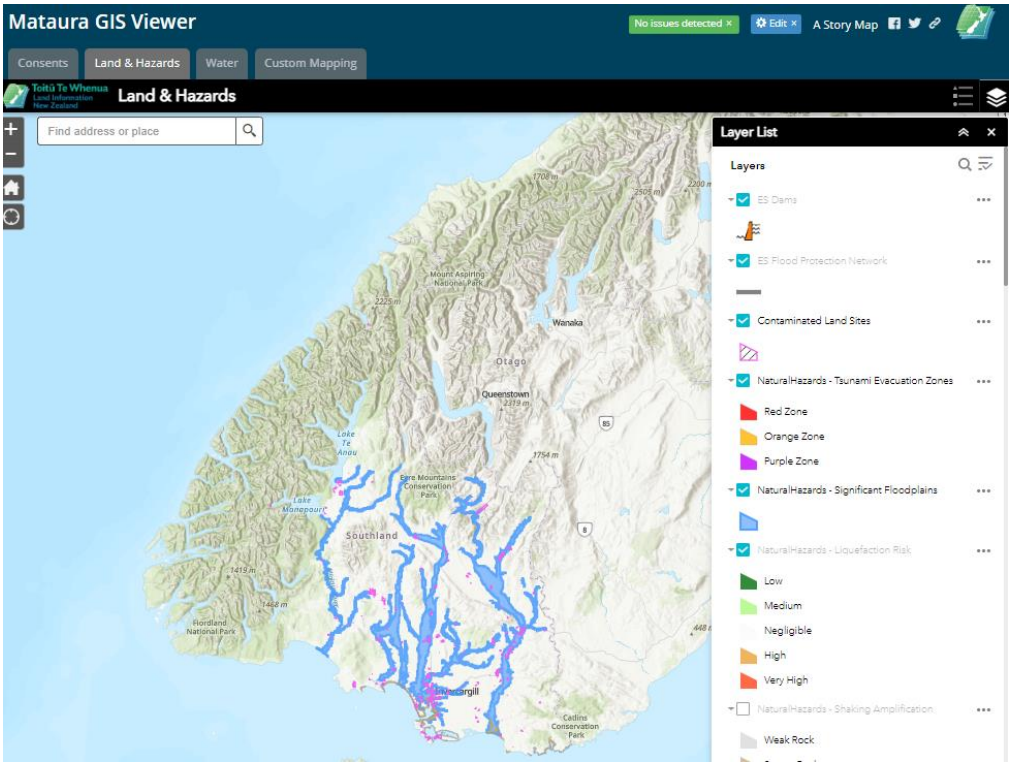
GIS VIEWER INSTRUCTIONS

Mataura GIS Viewer Introduction

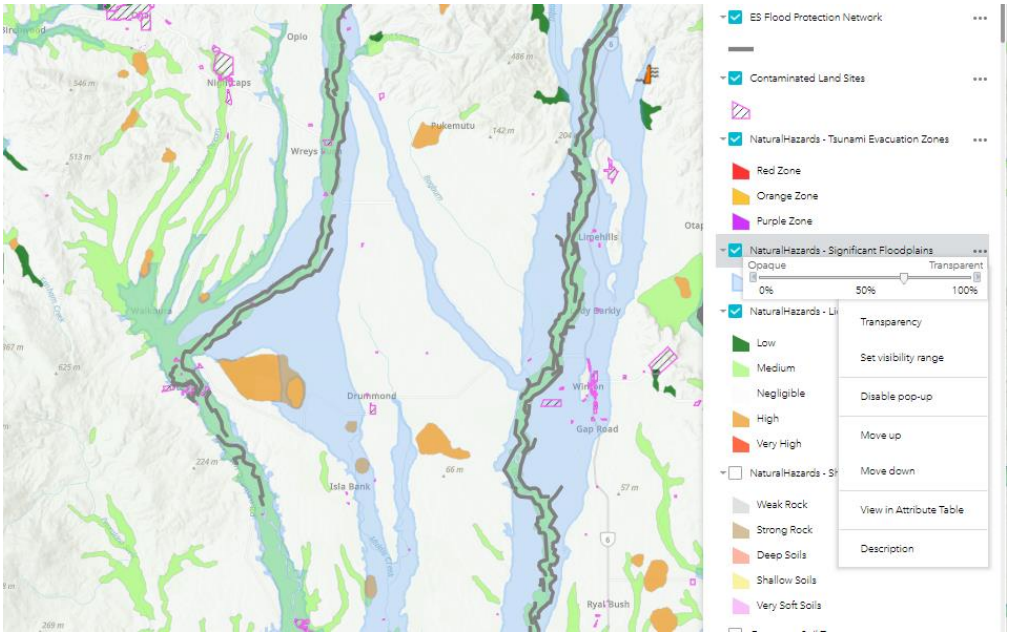
- Access this public viewer by clicking - https://arcg.is/0yzebL
- Currently there are four tabs – Consents, Land & Hazards, Water, Custom Mapping. In future there will be more tabs.
- Each tab has a range of layers you can toggle on and off.



- Top right corner, you have buttons for layers list and legend, you can toggle the layers on and off here.



- Handy tip: You can automatically adjust transparency by clicking the 3 dots next to a layer, select your required transparency if you have overlapping layers.



Functionality

- You have additional buttons on the top left corner. Feel free to explore them yourselves.
- You have zoom buttons you can click, easier way is to do it directly using your mouse of trackpad.
- Home button takes you back to the default view of the map, you also have a full screen option.
- If you want aerial imagery you can select from the Basemap Gallery.

- If you want to add data from external sources, please select Add Data widget, URL and insert the link and click add.
